

KEEP PETS COOL DURING EXTREME HEAT

Cool down your pets by giving cool treats / cold food / chilled wet food. Use a cooling body wrap, cooling vest or cooling mat.

Keep pets indoors during the hottest times of the day.

Plan walks for morning or evening hours, play on grassy areas, take breaks and bring water.

Make sure your home is cool, well ventilated and your pets have lots of fresh water.

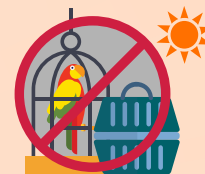

If your building has a chill room, bring your pets with you.

Ask your vet or groomer about shaving your pets. Some dog breeds shouldn't be shaved because coats help dogs cool off.

Don't leave your pets like birds in direct sunlight or dogs in crates **without** fresh water or in the sun. Fans don't cool pets as effectively as humans.

Don't walk your pets midday or let them walk on asphalt for long periods of time.

Don't muzzle your large dogs, they need to pant to cool themselves.

Don't leave your pets in a parked car for any amount of time.
